

Superblock 12 & Superblock 6

**CONCRETE
PRODUCTS MACHINE**

CONTEC

● **RELIABLE - HEAVY DUTY CONSTRUCTION LOW MAINTENANCE**

SB 12 movable block machine offers very wide production range of concrete products. It can be used as universal machine as well as special product making machine. This multi – purpose block machine can be used for production of::

- Hollow blocks
- Chimney blocks
- Hourdy blocks
- Insulated blocks
- Garden blocks
- Solid blocks
- Curbstones
- Paving stones with or without face mix
- (vibration plate option or multilayer production)

Layers separated by plastic foil or by sand.

With its standard safety devices, rigid frame construction that allow heavy duty use, and simplicity of design that reduce maintenance to minimum, this machine is the most economical choice for very wide range of concrete products manufacturers.

TECHNICAL DATA

- Block height floor production: 175 -500 mm
- Block height vibration table production:..... 60 - 250 mm
- Production area: 1240 x 1130 mm
- Production area for machine with vibration table:..... 1240 x 850 mm
- Production capacity: 13.600 pcs / 8 hours for 20x20x40 cm hollow block type
- Number of high frequency vibrators: 6 pieces
- Machine weight with mould and without face mix device: ... 6.650 kg
- Machine weight with mould and with face mix device: 7.450 kg

● STATIONARY MULTILAYER FOR PAVING STONES PRODUCTION

SUPERBLOCK 12 ML

● SUPERBLOCK 6 & SUPERBLOCK 6 ECO

Its simplicity for operation, excellent compaction of concrete products, high speed cycle and easy maintenance makes this machine number one choice for start up in concrete products manufacturing business. Ideal for economic mass production of hi quality concrete blocks, as it requires no special foundations, but only flat concrete floor. Available in semiautomatic or automatic control, with user friendly control system. Machine is equipped with shunting wheel for turning of machine at end of production line. Hydraulic oil cooler for efficient regulation of oil temperature in hot areas is included as standard equipment.

Technical data SB 6:

- Block height floor production: 175 -350mm
- Production capacity: 6.900 pcs / 8 hours for 20x20x40 cm hollow block type
- Production area: 1240 x 550 mm
- Number of high frequency vibrators: 3 pieces
- Machine weight with mould: 4.200 kg

Technical data SB 6-ECO:

- Block height floor production: 175 -350mm
- Production capacity: 5.700 pcs / 8 hours for 20x20x40 cm hollow block type
- Production area: 1240 x 550 mm
- Number of high frequency vibrators: 3 pieces
- Machine weight with mould: 2.500 kg

SB 6 High efficiency movable block machine is for production of:

- Hollow blocks
- Chimney blocks
- Hourdy blocks
- Insulated blocks
- Garden blocks
- Light weight blocks
